

CONGRATULATIONS!

THANK YOU FOR PURCHASING THE LIONEL DREYFUSS HUDSON.

You now possess one of only 750 replicas of the famous Dreyfuss Hudson produced by Lionel Trains, Inc. Each locomotive and tender has been painstakingly reproduced to exacting standards.

Every aspect, literally every detail, of your new Dreyfuss Hudson was built to provide you a magnificent showpiece of scale proportions. To this end, the dimensions on virtually all of its parts were designed to be correct and authentic in appearance to the prototype made by the American Locomotive Company and streamlined by the New York Central Railroad.

Whether on display, operating on T-rail profiled track, or on the stationary operating roller base, the scale features accentuate the locomotive's beauty. However, when operating your Hudson on tubular profiled track you may wish to enhance its performance by using wheel sets with tinplate style flanges.

We will provide you with the optional front and rear wheel sets that feature tinplate style flanges. We will send these wheel sets to you in the first quarter of 1994 along with a hardwood storage case at no additional charge.

Again, thank you for your patronage and your patience. We are very pleased to have provided you with this special locomotive and know that you will enjoy its beauty for many years to come. If you have any questions concerning the Dreyfuss Hudson, please feel free to write to us or to give us a call.
